Volume 184 1989

Table of contents

No. 1 1–266 issued on September 1, 1989
No. 2 267–486 issued on September 15, 1989
No. 3 487–730 issued on October 1, 1989

Corrections 729

Reviews

Dehydrogenases for the synthesis of chiral compounds
W. Hummel and M.-R. Kula 1–13

Chemical model systems for drug-metabolizing cytochrome-*P*-450-dependent monooxygenases
D. Mansuy, P. Battioni and J.-P. Battioni 267–285

Growth factors as transforming proteins
C.-H. Heldin and B. Westermark 487–496

Nucleic acids, protein synthesis and molecular genetics

Antisense oligonucleotide inhibition of encephalomyocarditis virus RNA translation
S. Sankar, K.-C. Cheah and A. G. Porter 39–45

Reactivity of the P-site-bound donor in ribosomal peptide-bond formation
D. Synetos and C. Coutsogeorgopoulos 47–52

Effects of the cellular p53 protein on Simian-virus 40-T-antigen-catalyzed DNA unwinding *in vitro*
H. Kienzle, M. Baack and R. Knippers 181–186

Synthesis, processing and degradation in yeast of precursor human lysozyme with newly designed signal sequences
Y. Yamamoto and M. Kikuchi 233–236

Structural changes in positively and negatively supercoiled DNA
S. Brahms, S. Nakasu, A. Kikuchi and J. G. Brahms 297–303

Purification and characterization of a nuclear factor which binds specifically to the upstream activation sequence of *Saccharomyces cerevisiae* enolase 1 gene
M. Machida, Y. Jigami and H. Tanaka 305–311

Molecular analysis of glycophorin A and B gene structure and expression in homozygous Miltenberger class V (Mi.V) human erythrocytes
A. Vignal, C. Rahuel, B. el Maliki, J. London, C. le van Kim, D. Blanchard, C. Andre, L. d'Auriol, F. Galibert, M. A. Blajchman and J.-P. Cartron 337–344

Interaction of elongation factor Tu from *Escherichia coli* with aminoacyl-tRNA carrying a fluorescent reporter group on the 3' terminus
G. Ott, H. G. Faulhammer and M. Sprinzl 345–352

Isolation and characterisation of a cDNA clone for a chlorophyll synthesis enzyme from *Euglena gracilis* – The chloroplast enzyme hydroxymethylbilane synthase (porphobilinogen deaminase) is synthesised with a very long transit peptide in *Euglena*
A. L. Sharif, A. G. Smith and C. Abell 353–359

Synthesis of a gene for the protein kinase domain of the epidermal growth factor receptor and its expression in *Escherichia coli*
S. N. Farrow, H. Kamiya, K. Miura, E. Ohtsuka and S. Nishimura 361–365

Human immunodeficiency virus reverse transcriptase expressed in transformed yeast cells – Biochemical properties and interactions with bovine $tRNA^{Lys}$
M.-L. Sallafranque-Andreola, D. Robert, P. J. Barr, M. Fournier, S. Litvak, L. Sarih-Cottin and L. Tarrago-Litvak 367–374

Conformational consequences of the incorporation of arabinofuranosylcytidine in DNA – An NMR study of the DNA fragments d(CGCTAGCG) and d(CGaCTAGCG) in solution
J. M. L. Pieters, E. de Vroom, G. A. van der Marel, J. H. van Boom and C. Altona 415–425

Isolation of a cDNA encoding the rat liver *S*-adenosylmethionine synthetase
S. Horikawa, M. Ishikawa, H. Ozasa and K. Tsukada 497–501

Binding of globin mRNA, β-globin mRNA segments and RNA homopolymers by immobilized protein of polysomal globin messenger ribonucleoprotein
M. Görlach, M. Hermann, M. Schwemmle and K. Hilse 589–596

Analysis of the α-amylase gene of *Schwanniomyces occidentalis* and the secretion of its gene product in transformants of different yeast genera
A. W. M. Strasser, R. Selk, R. J. Dohmen, T. Niermann, M. Bielefeld, P. Seeboth, G. Tu and C. P. Hollenberg 699–706

Protein chemistry and structure

Nuclear-magnetic-resonance investigation of the cooperative homodimeric hemoglobin from the mollusc *Scapharca inaequivalvis* – Molecular and electronic structure of the cyano-met derivative
J. L. McGourty, G. N. La Mar, K. M. Smith, F. Ascoli, E. Chiancone, R. K. Pandey and J. P. Singh 53–61

The effect of aqueous methanol cryosolvents on the heat- and cold-induced denaturation of lactate dehydrogenase
R. H. M. Hatley and F. Franks 237–240

Binding of nidogen and the laminin-nidogen complex to basement membrane collagen type IV
M. Aumailley, H. Wiedemann, K. Mann and R. Timpl 241—248

Crystallization properties and structure of *Panulirus interruptus* haemocyanin
T. Wichertjes, W. Keegstra, B. Neuteboom, B. Hazes, J. J. Beintema and E. F. J. van Bruggen 287–296

Immunological detection of phytoene desaturase in algae and higher plants using an antiserum raised against a bacterial fusion-gene construct
A. Schmidt, G. Sandmann, G. A. Armstrong, J. E. Hearst and P. Böger 375–378

NMR study of a 34-residue N-terminal fragment of the parathyroid-hormone-related protein secreted during humoral hypercalcemia of malignancy
J. A. Barden and B. E. Kemp 379–394

A structural study of bovine lens α-crystallin and its subunits by absorption and linear dichroism spectroscopy
M. Bloemendal, H. van Amerongen, H. Bloemendal and R. van Grondelle 427–432

Guanylate kinase from *Saccharomyces cerevisiae* — Isolation and characterization, crystallization and preliminary X-ray analysis, amino acid sequence and comparison with adenylate kinases
A. Berger, E. Schiltz and G. E. Schulz 433–443

An NMR analysis of the binding of inhibitors to yeast phosphoglycerate kinase
H. A. Boyle, W. J. Fairbrother and R. J. P. Williams 535–543

Catalytic activity and denaturation of enzymes in water/organic cosolvent mixtures — α-Chymotrypsin and laccase in mixed water/alcohol, water/glycol and water/formamide solvents
V. V. Mozhaev, Y. L. Khmelnitsky, M. V. Sergeeva, A. B. Belova, N. L. Klyachko, A. V. Levashov and K. Martinek 597–602

Site-directed mutagenesis of the spinach acyl carrier protein-I prosthetic group attachment site
J. G. Jaworski, M. A. Post-Beittenmiller and J. B. Ohlrogge 603–609

Two distinct nonmuscle myosin-heavy-chain mRNAs are differentially expressed in various chicken tissues — Identification of a novel gene family of vertebrate non-sarcomeric myosin heavy chains
Y. Katsuragawa, M. Yanagisawa, A. Inoue and T. Masaki 611–616

One- and two-dimensional NMR studies of yeast phosphoglycerate kinase
W. J. Fairbrother, D. Bowen, L. Hall and R. J. P. Williams 617–625

Differential exposure of aromatic amino acids in the red-light-absorbing and far-red-light-absorbing forms of 124-kDa oat phytochrome
B. R. Singh, P.-S. Song, P. Eilfeld and W. Rüdiger 715–721

Enzymology

Purification and properties of a polyol dehydrogenase from the phototrophic bacterium *Rhodobacter sphaeroides*
K.-H. Schneider and F. Giffhorn 15— 19

Purification and characterization of an acetyl-CoA hydrolase from *Saccharomyces cerevisiae*
F.-J. S. Lee, L. W. Lin and J. A. Smith 21— 28

Methyl-coenzyme-M reductase from *Methanobacterium thermoautotrophicum* (strain Marburg) — Purity, activity and novel inhibitors
J. Ellermann, S. Rospert, R. K. Thauer, M. Bokranz, A. Klein, M. Voges and A. Berkessel 63— 68

Differential induction of peroxisomal and microsomal fatty-acid-oxidising enzymes by peroxisome proliferators in rat liver and kidney — Characterisation of a renal cytochrome *P*-450 and implications for peroxisome proliferation
R.-Sharma, B. G. Lake, R. Makowski, T. Bradshaw, D. Earnshaw, J. W. Dale and G. G. Gibson 69— 78

Purification of the F_{420}-reducing hydrogenase from *Methanosarcina barkeri* (strain Fusaro)
K. Fiebig and B. Friedrich 79— 88

Carboxylic acid reductase: a new tungsten enzyme catalyses the reduction of non-activated carboxylic acids to aldehydes
H. White, G. Strobl, R. Feicht and H. Simon 89— 96

γ-Glutamylcyclotransferase: inhibition by D-β-aminoglutaryl-L-alanine and analysis of the solvent kinetic isotope effect
M. J. York, M. J. Crossley, S. J. Hyslop, M. L. Fisher and P. W. Kuchel 97—101

Assay and purification of the adenosylcobalamin-dependent 2-methyleneglutarate mutase from *Clostridium barkeri*
C. Michel, G. Hartrampf and W. Buckel 103—107

On the mechanism of inhibition of methanol dehydrogenase by cyclopropane-derived inhibitors
J. Frank Jr, S. H. van Krimpen, P. E. J. Verwiel, J. A. Jongejan, A. C. Mulder and J. A. Duine 187—195

Analysis of the cDNA for phospholipase A_2 from honeybee venom glands — The deduced amino acid sequence reveals homology to the corresponding vertebrate enzymes
K. Kuchler, M. Gmachl, M. J. Sippl and G. Kreil 249—254

Purification and characterization of the thermostable ribulose-1,5-bisphosphate carboxylase/oxygenase from the thermophilic purple bacterium *Chromatium tepidum*
G. D. Heda and M. T. Madigan 313–319

Serological analysis and characterization of calf thymus ribonuclease H IIb
H. Vonwirth, P. Frank and W. Büsen 321–329

Glucosephosphate isomerase from *Trypanosoma brucei* — Cloning and characterization of the gene and analysis of the enzyme
M. Marchand, U. Kooystra, R. K. Wierenga, A.-M. Lambeir, J. Van Beeumen, F. R. Opperdoes and P. A. M. Michels 455–464

Isolation of similar rolipram-inhibitable cyclic-AMP-specific phosphodiesterases from rat brain and heart
G. Némoz, M. Moueqqit, A.-F. Prigent and H. Pacheco 511–520

Purification and molecular properties of rabbit liver esterase ES-1A
H. A. van Lith, M. den Bieman and B. F. M. van Zutphen 545–551

Studies of the cellulolytic system of *Trichoderma reesei* QM 9414 — Binding of small ligands to the 1,4-β-glucan cellobiohydrolase II and influence of glucose on their affinity
H. Van Tilbeurgh, F. G. Loontiens, Y. Engelborgs and M. Claeyssens 553–559

Effect of evolution on the kinetic properties of enzymes
G. Pettersson 561–566

Protein transfer from an aqueous phase into reversed micelles — The effect of protein size and charge distribution
R. B. G. Wolbert, R. Hilhorst, G. Voskuilen, H. Nachtegaal, M. Dekker, K. van't Riet and B. H. Bijsterbosch 627–633

Arginase of *Agrobacterium* Ti plasmid C58 — DNA sequence, properties, and comparison with eucaryotic enzymes
A. Schrell, J. Alt-Moerbe, T. Lanz and J. Schroeder 635–641

Enantiotopic differentiation in horse-liver alcohol-dehydrogenase-catalyzed oxidoreduction studied with novel substrates having organometallic moieties
Y. Yamazaki, M. Uebayasi and K. Hosono 671–680

Purification and characterization of cytochrome *P*-450$_{sca}$ from *Streptomyces carbophilus* — ML-236B compactin induces a cytochrome *P*-450$_{sca}$ in *Streptomyces carbophilus* that hydroxylates ML-236B to pravastatin sodium (CS-514), a tissue-selective inhibitor of 3-hydroxy-3-methylglutaryl-coenzyme A reductase
T. Matsuoka, S. Miyakoshi, K. Tanzawa, K. Nakahara, M. Hosobuchi and N. Serizawa 707–713

The free radical of pyruvate formate-lyase — Characterization by EPR spectroscopy and involvement in catalysis as studied with the substrate-analogue hypophosphite
V. Unkrig, F. A. Neugebauer and J. Knappe 723–728

Carbohydrates, lipids and other natural products

Structural analysis of the carbohydrate chains of a mouse monoclonal IgM antibody
H. Krotkiewski, B. Nilsson and S. Svensson 29— 38

Alterations in plasma lipoproteins and apolipoproteins associated with estrogen-induced hyperlipidemia in the laying hen
D. Hermier, P. Forgez, J. Williams and M. J. Chapman 109—118

Glycosylation of glycoproteins 52 and 65 encoded by the polycythemia-inducing strain of Friend spleen focus-forming virus — Isolation of glycopeptides containing individual glycosylation sites
K.-H. Strube, F. Lottspeich and R. Geyer 119—124

Modulatory activity of 9-hydroxy- and 9-hydroperoxy-octadecadienoic acid towards reactive oxygen species from guinea-pig pulmonary macrophages
F. Engels, P. A. J. Henricks, H. van der Vliet and F. P. Nijkamp 197—203

O-Linked GlcNAc in serotype-2 adenovirus fibre
M.-L. Caillet-Boudin, G. Strecker and J.-C. Michalski 205—211

Stimulation of the methylcoenzyme M reduction by uridine-5'-diphospho-sugars in cell-free extracts of *Methanobacterium thermoautotrophicum* (strain ΔH)
J. T. Keltjens, H. J. Kraft, W. G. Damen, C. van der Drift and G. D. Vogels 395–403

Presence of fucosylated triantennary, tetraantennary and pentaantennary glycans in transferrin synthesized by the human hepatocarcinoma cell line Hep G2
B. Campion, D. Léger, J.-M. Wieruszeski, J. Montreuil and G. Spik 405–413

Synthesis of different nucleoside 5'-diphospho-sulfoquinovoses and their use for studies on sulfolipid biosynthesis in chloroplasts
E. Heinz, H. Schmidt, M. Hoch, K.-H. Jung, H. Binder and R. R. Schmidt 445–453

Physical and inorganic biochemistry

Water in the active cavity of copper/zinc superoxide dismutase — A water ^{1}H-nuclear-magnetic-relaxation-dispersion study
L. Banci, I. Bertini, R. A. Hallewell, C. Luchinat and M. S. Viezzoli 125—129

Nematocysts (stinging capsules of *Cnidaria*) as Donnan-potential-dominated osmotic systems
J. Weber 465–476

Membranes and bioenergetics

Evidence of a calcium-induced structural change in the ATP-binding site of the sarcoplasmic-reticulum Ca^{2+}-ATPase using terbium formycin triphosphate as an analogue of Mg-ATP
J.-L. Girardet, Y. Dupont and J.-J. Lacapere 131—140

Localization of the ATP-binding site in the 23-kDA and 20-kDa regions of the heavy chain of the skeletal muscle myosin head
S. Maruta, T. Miyanishi and G. Matsuda 213—221

The role of sodium ions in methanogenesis — Formaldehyde oxidation to CO_2 and $2H_2$ in methanogenic bacteria is coupled with primary electrogenic Na^+ translocation at a stoichiometry of 2–3 Na^+/CO_2
B. Kaesler and P. Schönheit 223—232

Thyroid hormone regulation of nuclear-encoded mitochondrial inner membrane polypeptides of the liver
V. Joste, Z. Goitom and B. D. Nelson 255—260

Two types of cytochrome *cd*$_1$ in the aerobic photosynthetic bacterium, *Erythrobacter* sp. OCh 114
M. Doi, Y. Shioi, M. Morita and K.-I. Takamiya 521–527

Marker enzymes in rat liver vesicles involved in transcellular transport
J. Quintart, P. Baudhuin and P. J. Courtoy 567–574

Acyl carrier protein is present in the mitochondria of plants and eucaryotic micro-organisms
L. Chuman and S. Brody 643–649

Nuclearly inherited diuron-resistant mutations conferring a deficiency in the NADH – or succinate – ubiquinone oxidoreductase activity in *Saccharomyces cerevisiae*
B. Meunier, A.-M. Colson-Corbisier and D. Lemesle-Meunier 651–656

Metabolism and metabolic regulation

Molecular oxygen and the state of geometric isomerism of intermediates are essential in the carotene desaturation and cyclization reactions in daffodil chromoplasts
P. Beyer, M. Mayer and H. Kleinig 141—150

^{13}C-NMR study of autotrophic CO_2 fixation in *Thermoproteus neutrophilus*
S. Schäfer, M. Götz, W. Eisenreich, A. Bacher and G. Fuchs 151—156

The metabolic consequences of hydroperoxide perfusion on the isolated rat heart
J. C. Chatham, H. F. Gilbert and G. K. Radda 657–662

Octanoate metabolism in isolated hepatocytes and mitochondria from fetal, newborn and adult rabbit – Evidence for a high capacity for octanoate esterification in term fetal liver
J.-P. Pégorier, P.-H. Duée, P. Clouet, C. Kohl, C. Herbin and J. Girard 681–686

Signal transduction and molecular neurobiology

Characterization of a mitogen-activated, Ca^{2+}-sensitive microtubule-associated protein-2 kinase
M. Hoshi, E. Nishida and H. Sakai 477–486

The transitory complex between photoexcited rhodopsin and transducin – Reciprocal interaction between the retinal site in rhodopsin and the nucleotide site in transducin
F. Bornancin, C. Pfister and M. Chabre 687–698

Molecular cell biology

Tightly bound DNA-protein complexes representing stable attachment sites of large DNA loops to components of the matrix
C. Patriotis and L. Djondjurov 157—164

Post-translational modifications in mitotic yeast cells
L. T. Nevalainen, J. Louhelainen and M. Makarow 165—172

Functional complementation of catalase-defective peroxisomes in a methylotrophic yeast by import of the catalase A from *Saccharomyces cerevisiae*
H. Hansen and R. Roggenkamp 173—179

Post-transcriptional regulation of 5S rRNA synthesis following myoblast differentiation
P. Zahradka, D. E. Larson and B. H. Sells 261—266

Specific binding of bone sialoprotein to *Staphylococcus aureus* isolated from patients with osteomyelitis
C. Rydén, A. I. Yacoub, I. Maxe, D. Heinegård, Å. Oldberg, A. Franzén, Å. Ljungh and K. Rubin 331–336

2-Aminopurine selectively blocks the transcriptional activation of cellular genes by virus, double-stranded RNA and interferons in human cells
M. G. Wathelet, I. M. Clauss, F. C. Paillard and G. A. Huez 503–509

Phosphorylation of the high-mobility-group-like protein P1 by casein kinase-2
G. M. Mælandsmo, A. C. Østvold and S. G. Laland 529–534

Molecular and cellular studies of tryptophanyl-tRNA synthetase using monoclonal antibodies – Evaluation of a common antigenic determinant in eukaryotic, prokaryotic and archaebacterial enzymes which maps outside the catalytic domain
S. F. Beresten, T. A. Zargarova, O. O. Favorova, B. I. Rubikaite, A. G. Ryazanov and L. L. Kisselev 575–581

Molecular and cellular studies of tryptophanyl-tRNA synthetases using monoclonal antibodies – Remarkable variations in the content of tryptophanyl-tRNA synthetase in the pancreas of different mammals
O. O. Favorova, T. A. Zargarova, V. S. Rukosuyev, S. F. Beresten and L. L. Kisselev 583–588

Degradation of tomato pathogenesis-related proteins by an endogenous 37-kDa aspartyl endoproteinase
I. Rodrigo, P. Vera and V. Conejero 663–669
